Last modified: 2003/05/06 - Central Page
Open the data collection: EEA requests
Open the subcollection: TE-2 Contaminated Soil
Add a new envelope for the 2003 delivery (1)
Add a new envelope for the 2003 delivery (2)

Meta data for the delivery would be helpful.

Add the envelope for the 2003 delivery.
Click to open the new envelope
Upload the data files into the envelope (1)

Upload your data into the open envelope.

You can choose to load a single file or a zipfile.
Upload the data files into the envelope (2)

Find the file to be delivered on your own system
Release the envelope when all relevant files have been loaded.
Release of an envelope can be cancelled if an error has been made.
How to find data deliveries at a later stage

Find deliveries by keyword

Find deliveries by reporting obligation

Find recently uploaded deliveries

The Central Data Repository is part of the ReportNet architecture. The Central Data Repository is like a bookshelf, with data reports on the environment as submitted to international clients.

Each country either has a collection (url) for its deliveries or a referral to a different preferred repository. The data reports within each country collection are arranged under the relevant reporting obligations or agreements.

New users: To get upload access or to change the country-level collection to a referral, please make a request to EIONET MRC: helpdesk@eionet.eu.int
